# TEAM LINE

# VELOCHAMPION

**Designed to offer the maximum value, comfort, quality**

The Team fit line has been designed for cyclists who enjoy spending time outdoors with friends, sharing in the enjoyment of doing sport and feeling free. The Team Fit range maximise comfort and are ideal for those who are looking for high quality products at a great value.

The team jersey is made from a combination of light, breathable fabrics in order to guarantee complete and absolute freedom of movement.

The Team Bibs have an ergonomic structure and are made using different materials to ensure the best fit and appropriate compression all over. They're perfect for all types of cyclist.

## TEAM 101

Short sleeve jersey/ Long zip with zip pocket

Panels on the sides are ergonomic, not straight panel. Even if it's our basic jersey, we have made a high quality product, adapted to the cyclist body.  
"Dameró" fabric: light and breathable, to guarantee an absolute freedom of movement.  
Camlock system in the zip, to prevent the zip from unzipping itself.  
Soft lycra on the sleeves.  
Elastic silicone band on the waist.  
Reflector on the pockets.  
No annoying label tags at the neck.

## TEAM 135

Thermal jacket total membrane

Panels on the sides are ergonomic, not straight panel, adapted to the cyclist body. These panels are made with lycra to fit better to everybody. "Windprotect" membrane: total protection against the cold and the wind and it regulates body temperature.  
Camlock system in the zip, to prevent the zip from unzipping itself.  
Ergonomic and elastic mesh on the cuff, to ensure the perfect fitting.  
Elastic silicone band on the waist.  
Reflector on the pockets.  
No annoying label tags at the neck.

## TEAM 125

long sleeve Fleece Jacket

Panels on the sides are ergonomic, not straight panel, adapted to the cyclist body. "Superwarm" fabric: Thanks to its fleecy brushed texture on the inside, it's perfect for fall/winter. It provides good thermal protection and regulates body temperature. Camlock system in the zip, to prevent the zip from unzipping itself.  
Ergonomic and elastic mesh on the cuff, to ensure the perfect fitting.  
Elastic silicone band on the waist.  
Reflector on the pockets.  
No annoying label tags at the neck.

**TEAM 216**  
BIB SHORTS

Same design structure than the Plus and Plus woman bib shorts, so all the types of cyclists that belong to a club can dress the same. "Performer" fabric: Let the comfort take you to the best performance! The polyamide thread structure with lycra provides compression, adaptability and durability. It is located in the non-customizable part of the bibshort. Bibs: with soft mesh, that guarantees perspiration and comfort. Flat edges for an elastic border meant to create a better hold. Lass pad: Seamless pad that provides excellent performance and comfort. Thanks to its light weight, elasticity and anatomical form, this pad is the ideal choice.

**TEAM 416**  
BIB TIGHTS

"Super Roubaix" fabric: Its fleecy brushed interior and the polyamide provide complete comfort and compression while regulating body temperature and guaranteeing excellent moisture control. Located in the non-customizable part of the bib knickers, its excellent durability makes it ideal for handling friction on the seat. Bibs: with soft mesh, that guarantees perspiration and comfort. Bibs: with soft mesh, that guarantees perspiration and comfort. Flat edges for an elastic border meant to create a better hold. Lass pad: Seamless pad that provides excellent performance and comfort. Thanks to its light weight, elasticity and anatomical form, this pad is the ideal choice..

Very effective as a road safety element.</p>	<p><b>ZIPPER CAMLOCK</b> Zipper lock to prevent vibrations</p> <p>The zipper comes equipped with a blocking system, which prevents the pull tab from moving. This mechanism will make sure the zipper doesn't vibrate or open on its own. Designed to use it even with only two fingers.</p> 
--	---	--

Main fabrics used in short and long jerseys:

**DAMERO FABRIC**  
Lightweight and breathable

It provides optimal breathability thanks to its grid-like structure formed by small squares on different planes. It's located in the entire trunk area to guarantee complete freedom of movement.

Lightness	★★★★☆	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★☆☆☆☆
		Hydrophilic	<input checked="" type="checkbox"/>

**SUPERWARM FABRIC**  
The perfect fabric to keep warm

Thanks to its fleecy brushed texture on the inside, it's perfect for winter. Located on the back, it provides good thermal protection and regulates body temperature.

Thermal protection	★★★★☆	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★☆☆☆☆

Additional jackets' features:

**MEMBRANE WINDPROTECT**  
Don't let the wind stop you

It offers a total protection against the wind. It's breathable to keep the skin dry and termic regulator body temperature.

**TERMOPOWER FABRIC**  
Protect from cold weather and regulates your body heat

Specific for winter time, thanks to its inside windprotect membrane structure fabric. Located at the front of the rider's body provides good thermal protection and body temperature termic regulator.

Thermal protection	★★★★★	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★☆☆☆☆
		Windprotect	<input checked="" type="checkbox"/>

## TECNOLOGY & MATERIALS [TECH]

Find out all the technology we have developed to achieve maximum comfort

### BIBS

Basic features of our TEAM line:

#### COMFORT POSITION /ERGONOMIC GEOMETRY

Designed to fit your body

All TEAM line bibs have a soft compression, high in the abdominal and lumbar area, so they can offer a comfortable grip feeling.

#### MAUSSER SEAMS

Flat seams to avoid unnecessary friction

Flat, elastic seam made with a specialized machine in order to avoid stains, scratches and possible irritants to the skin.

#### REFLECTIVE BAND REFLECTOR

Visibility as a security element

Visibility is very important. That's why we incorporated a reflective strip to increase the visibility when riding with low light. Very effective as a road safety element.

Main fabrics used:

#### PERFORMER FABRIC

Let the comfort take you to the best performance

The polyamide thread structure with lycra provides compression, adaptability and durability. It is located in the non-customizable part of the bibshort.

Resistance	★★★★☆	Adaptability	★★★★☆
Transpirabilitat	★★★☆☆	Compression	★★★★☆
Bielastic	<input checked="" type="checkbox"/>	Opaque	<input checked="" type="checkbox"/>

#### SUPERROUBAIX FABRIC

Cold weather, warm body

Its fleecy brushed interior and the polyamide provide complete comfort while regulating body temperature and guaranteeing excellent moisture control. Located on the exterior part of the seat of the bibs, its excellent durability makes it ideal for handling friction on the seat.

Thermal protection	★★★★★	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★★★★☆
Bielastic	<input checked="" type="checkbox"/>	Pilling resistant	<input checked="" type="checkbox"/>

Bib's structure:

#### STRAPS

Maximum freedom of movement

Fastening system consists of a polyester mesh edges with flat edges for an elastic border meant to create a better hold.

#### LASS PAD

Anatomical and light, an all road

Seamless pad that provides excellent performance and comfort. Thanks to its light weight, elasticity and anatomical form, this pad is the ideal choice.

It has a Coolmax-type fabric on the exterior which guarantees sufficient ventilation while minimizing friction.

# CHOOSE YOUR RIGHT SIZE

Welcome. This page describes step by step, how to determine the most appropriate size you need so you can enjoy the most of a good CUSTOM Line product.

## SEARCH YOUR MEASUREMENTS ON SIZE CHART.

### - For the JERSEY's size

TEAM FIT	XS	S	M	L	XL	2XL	3XL	4XL
<b>A</b> CHEST CIRCUMFERENCE	86	92	98*	104*	110	116	122	128
<b>B</b> ARM LENGTH	75	77	80	82	85	87	89	91
<b>C</b> FRONT LENGTH	51	53	55	57	59	61	63	65

Size A - "Chest circumference" remains a priority for the rest

### - For the BIB's size

TEAM FIT	XS	S	M	L	XL	2XL	3XL	4XL
<b>D</b> WAIST CIRCUMFERENCE	73	79	85	91	97	103	109	115
<b>E</b> LEG LENGTH	74	76	78	80	82	84	86	88

Size D - "Waist circumference" remains a priority for the rest

- Use one measuring tape to determine the exact measurements.

- Measure the distances according to the design below.

- A - Chest size
- B - Arm length
- C - Upper body size
- D - Waist size
- E - Inseam measurement

Loose fit?

Sport fit?

Determine your appropriate size depending on whether you like to dress more or less adjusted.

**Example:** According to your specific preference, if your chest (A) is 100 cm.

- If you prefer dressing a **sport fit** line, choose size **(M)** (96 cm)
- If you prefer dressing a **loose fit**, choose size **(L)** (102 cm)

TEAM PLUS MENS LINE

 VELOCHAMPION

## To achieve maximum performance

The Plus Fit for Man line has been designed and created for demanding cyclists who cannot imagine life without cycling. It's meant to be comfortable, of course, but without losing sight of the fact that it's the balance between comfort and muscular compression that allows for improved results.

Designed to maintain a more curved and aggressive position while on the bicycle, the jersey has a semi-compressive structure and is made with various fabrics which are perfect for enjoying an ultra-light feeling and for achieving optimal breathability. It's ideal for improving performance without sacrificing comfort.

As for the bibs, they have an ergonomic structure made from various fabrics that were specifically chosen to provide each part of the body with the exact amount of compression it demands.

## TEAM PLUS MAN 106/2

Short sleeve jersey/ Long zip with zip pocket

Ergonomic shape, mainly on the sides of the product. They are completely different than what the customer may have seen before in teamwear. 2 different lycras, to ensure the best compression and performance. "Host carbon" fabric: protects body from absorbing static electricity and UV sun rays, and guarantees perspiration. Elastic and breathable mesh underarms.

"Sigmagrip" technology on the sleeves: second skin feeling. No seams.

Printed elastic silicone developed by TACTIC that keeps the elasticity on the sleeve. Occult zip, to ensure that the design is perfect.

"Camlock" system in the zip, to prevent the zip from unzipping itself.

Back of the jersey, highlight two things:

The easy-reach pockets (diagonal cut).

The reflector (very smart).

No annoying label tags at the neck.

## TEAM PLUS MAN 131

long sleeve Fleece Jacket

Ergonomic shape, mainly on the sides of the product. They are completely different than what the customer may have seen before in teamwear. 2 different fleece lycras, to ensure the best compression and performance.

"Superwarm" fabric: Thanks to its fleecy brushed texture on the inside, it's perfect for fall/winter. It provides good thermal protection and regulates body temperature.

Ergonomic and elastic mesh on the cuff, to ensure the perfect fitting. Occult zip, to ensure that the design is perfect.

"Camlock" system in the zip, to prevent the zip from unzipping itself.

Back of the jersey, highlight two things:

The easy-reach pockets (diagonal cut).

The reflector (very smart).

No annoying label tags at the neck..

## TEAM PLUS MAN 137

Thermal jacket total membrane

Ergonomic shape, mainly on the sides of the product. They are completely different than what the customer may have seen before in teamwear. 2 different fleece lycras, to ensure the best compression and performance. "Windprotect" membrane: total protection against the cold and the wind and it regulates body temperature. Special neck: wider in front than at the back, because it is thought for the "on the bicycle" position. Single fabric printable inside/outside.

Double cuff: to put the glove in the middle and protect from the wind.

Occult zip, to ensure that the design is perfect.

"Camlock" system in the zip, to prevent the zip from unzipping itself.

Back of the jersey, highlight two things:

The easy-reach pockets (diagonal cut).

The reflector (very smart).

No annoying label tags at the neck..

**TEAM PLUS 234**  
BIB SHORTS

**“Sigmagrip” technology** on the legs: second skin feeling. No seams. Printed elastic silicone developed by TACTIC that keeps the elasticity on the legs. **“Performer” fabric:** Let the comfort take you to the best performance! The polyamide thread structure with lycra provides compression, adaptability and durability. It is located in the non-customizable part of the bibshort.

**Bibs:** perforated crochet elastic bibs, designed to adapt to the cyclist’s body and guarantee optimum ventilation. The straps close in the back using a technical mesh. It is very smooth and breathable, assuring that sweat from the back evaporates quickly.

**Speed pad** (developed by Elastic Interface): This pad has an incredibly anatomical fit which guarantees great freedom of movement. The central panel in the perineal area has been designed with reinforced sections using two foams with different densities. They are three-dimensionally shaped in order to reduce friction and possible areas where chafing might occur.

**Extra feature** > Prof pad, for long distance: Hour after hour of protection on long rides! This pad has a special structure and EIT Carbonium fabric with bacteriostatic properties. It reduces friction and prevents static electricity. Four densities and a tri-dimensional shape with multiple thicknesses assure better distribution of weight and pressure on the seat. There is a panel in the perineal area and high-density foam on both sides. **Flat seams:** no friction. Reflector on both legs.

**TEAM PLUS 434**  
BIB TIGHTS

**“Super Roubaix” fabric:** Its fleecy brushed interior and the polyamide provide complete comfort and compression while regulating body temperature and guaranteeing excellent moisture control. Located in the non-customizable part of the bib knickers, its excellent durability makes it ideal for handling friction on the seat.

**Bibs:** perforated crochet elastic bibs, designed to adapt to the cyclist’s body and guarantee optimum ventilation. The straps close in the back using a technical mesh. It is very smooth and breathable, assuring that sweat from the back evaporates quickly.

**Speed pad** (developed by Elastic Interface): This pad has an incredibly anatomical fit which guarantees great freedom of movement. ### JERSEYS & JACKETS

Basic features of our PLUS line:

#### RACE POSITION /ERGONOMIC GEOMETRY

Designed to fit your body

Pattern system designed for a lower and more aggressive position to improve performance. The jersey is ergonomically shaped and has a compressive structure. Includes meshes for optimum breathability.

#### LYCRA SLEEVES

Seamless adherence and compression

They provide comfort and good adaptability thanks to our WEGAL garment fabric. The sleeves are cut at the border trim and finished with a strip of silicone to improve adherence.

#### REFLECTIVE BAND REFLECTOR

Visibility as a security element

Visibility is very important. That's why we incorporated a reflective strip to increase the visibility when riding with low light. Very effective as a road safety element.

#### POCKETS EasyReach Pockets

Let your hand have an easy access

The back pocket flaps are positioned to improve access and help you keep all that you need within reach.

#### ZIPPER CAMLOCK

Zipper lock to prevent vibrations

The zipper comes equipped with a blocking system, which prevents the pull tab from moving. This mechanism will make sure the zipper doesn't vibrate or open on its own. Designed to use it even with only two fingers.

#### OCCULT SYSTEM

Nothing interrupts your design

Sewing System that allows the two flaps that completely cover the zipper but don't interfere with the jersey's overall design for a greater definition.

Main fabrics used in short and long jerseys:

#### HOSTCARBON FABRIC

Lightweight and breathable

It provides optimal breathability thanks to its grid-like structure formed by small squares on different planes. Protects the body from absorbing static energy, electromagnetic and UV rays. It's located in the entire trunk area to guarantee complete freedom of movement.

Lightness	★★★★☆	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★☆☆☆☆
Anti-Bacterial	☑	Hydrophilic	☑

#### SUPERWARM FABRIC

The perfect fabric to keep warm

Thanks to its fleecy brushed texture on the inside, it's perfect for winter. Located on the back, it provides good thermal protection and regulates body temperature.

Thermal protection	★★★★☆	Adaptability	★★★★☆
Breathability	★★★☆☆	Compression	★☆☆☆☆

Additional jackets' features:

#### WINDBLOCKER NECK

Higher to protect your neck from the cold weather

Ergonomic collar design in which the front part is higher than the back, guaranteeing complete neck and chin protection against wind and cold when riding in cycling position. Includes a flat seam to avoid scratching and friction.

#### MEMBRANE WINDPROTECT

Don't let the wind stop you

It offers a total protection against the wind. It's breathable to keep the skin dry and termic regulator body temperature.

#### TERMOPOWER FABRIC

Protect from cold weather and regulates your body heat

Specific for winter time, thanks to its inside windprotect membrane structure fabric. Located at the front of the rider's body, it provides good thermal protection and body temperature termic regulator.

Thermal protection	★★★★★	Adaptability	★★★★☆	Windprotect	☑
Breathability	★★★☆☆	Compression	★☆☆☆☆		

## TECNOLOGY & MATERIALS [TECH]

Find out all the technology we have developed to achieve maximum comfort

### BIBS

Basic features of our PLUS line:

#### RACE POSITION /ERGONOMIC GEOMETRY

Designed to fit your body

All PLUS line bibs have a medium-high compression, with a low shape in the abdominal and lumbar area, so they can enhance the breathing and also offer a comfortable grip feeling.

#### MAUSSER SEAMS

Flat seams to avoid unnecessary friction

Flat, elastic seam made with a specialized machine in order to avoid stains, scratches and possible irritants to the skin.

#### REFLECTIVE BAND REFLECTOR

Visibility as a security element

Visibility is very important. That's why we incorporated a reflective strip to increase the visibility when riding with low light. Very effective as a road safety element.

#### STRIPES SIGMAGRIP

Seamless adherence and compression

System designed to obtain the closest fit possible with the least amount of pressure possible. Also seamless to improve comfort, reduce friction and aid in good circulation in the legs.

Main fabrics used:

#### PERFORMER FABRIC

Let the comfort take you to the best performance

The polyamide thread structure with lycra provides compression, adaptability and durability. It is located in the non-customizable part of the bibshort.

Resistance	★★★★☆	Adaptability	★★★★☆
Transpirability	★★☆☆☆	Compression	★★★★☆
Bielastic	<input checked="" type="checkbox"/>	Opaque	<input checked="" type="checkbox"/>

#### SUPERROUBAIX FABRIC

Cold weather, warm body

Its fleecy brushed interior and the polyamide provide complete comfort while regulating body temperature and guaranteeing excellent moisture control. Located on the exterior part of the seat of the bibs, its excellent durability makes it ideal for handling friction on the seat.

Thermal protection	★★★★★	Adaptability	★★★☆☆
Breathability	★★★★☆	Compression	★★★★☆
Bielastic	<input checked="" type="checkbox"/>	Pilling resistant	<input checked="" type="checkbox"/>

Bib structure:

#### STRAP PLUS by Tactic

Tecnologia per a una millor comoditat

A high-tech structure for perforated crochet elastic bibs, designed to adapt to the cyclist's body and guarantee optimum ventilation. The straps close in the back using a technical mesh. It is very smooth and breathable, assuring that sweat from the back evaporates quickly.

#### SPEED PAD

Flexible for greater freedom of movement

This pad has an incredibly anatomical fit which guarantees great freedom of movement. The central panel in the perineal area has been designed with reinforced sections using two foams with different densities. They are three-dimensionally shaped in order to reduce friction and possible areas where chafing might occur.

# CHOOSE YOUR RIGHT SIZE

Welcome. This page describes step by step, how to determine the most appropriate size you need so you can enjoy the most of a good CUSTOM Line product.

SEARCH YOUR MEASUREMENTS ON SIZE CHART.

- For the JERSEY's size

PLUS FIT	XS	S	M	L	XL	2L	3XL	4XL
A CHEST CIRCUMFERENCE	84	90	96	102*	108*	114	120	126
B ARM LENGTH	74	76	78	80	82	84	86	88
C FRONT LENGTH	48	50	52	54	56	68	60	62

Size A - "Chest circumference" remains a priority for the rest

- For the BIB's size

PLUS FIT	XS	S	M	L	XL	2XL	3XL	4XL
D WAIST CIRCUMFERENCE	73	79	85	91	97	103	109	115
E LEG LENGTH	74	76	78	80	82	84	86	88

Size D - "Waist circumference" remains a priority for the rest

- Use one measuring tape to determine the exact measurements.

- Measure the distances according to the design below.

- A - Chest size
- B - Arm length
- C - Upper body size
- D - Waist size
- E - Inseam measurement

Loose fit? Sport fit?

Determine your appropriate size depending on whether you like to dress more or less adjusted.

Example: According to your specific preference, if your chest (A) is 100 cm.

- If you prefer dressing a sport fit line, choose size **(M)** (96 cm)
- If you prefer dressing a loose fit, choose size **(L)** (102 cm)

TEAM PLUS WOMEN'S LINE

 VELOCHAMPION

## A Perfect Fit For The Female Figure

The Plus Fit for Woman line has been designed and created for demanding female cyclists who are looking for more than just comfort. Its design provides a high degree of comfort and muscular compression which help to optimize performance.

The jersey has a semi-compressive structure made from various fabrics which make for a light, breathable product. It's a garment made to outline the female figure: one that combines character and style, sport and fashion.

The bibs from the Plus Fit for Woman line have an ergonomic structure made with a combination of fabrics that provide each separate part of the body with the right amount of compression and support needed.

RACE POSITION

# TEAM PLUS WOMEN'S LINE

## JERSEYS & JACKETS

Basic features of our PLUS for Women line:

### RACE POSITION /ERGONOMIC GEOMETRY

Designed to fit women's body

Pattern system designed for a lower and more aggressive position to improve performance. The jersey is ergonomically shaped and has a compressive structure. Includes meshes for optimum breathability.

### LYCRA SLEEVES

Seamless adherence and compression

They provide comfort and good adaptability thanks to our WEGAL garment fabric. The sleeves are cut at the border trim and finished with a strip of silicone to improve adherence.

### REFLECTIVE BAND REFLECTOR

Visibility as a security element

Visibility is very important. That's why we incorporated a reflective strip to increase the visibility when riding with low light. Very effective as a road safety element.

### POCKETS EasyReachPockets

Let your hand have an easy access

The back pocket flaps are positioned to improve access and help you keep all that you need within reach.

### ZIPPER CAMLOCK

Zipper lock to prevents vibrations

The zipper comes equipped with a blocking system, which prevents the pull tab from moving. This mechanism will make sure the zipper doesn't vibrate or open on its own. Designed to use it even with only two fingers.

### OCCULT SYSTEM

Nothing interrupts your design

Sewing System that allows the two flaps that completely cover the zipper but don't interfere with the jersey's overall design for a greater definition.

Main fabrics used in short and long jerseys:

### HOSTCARBON FABRIC

Lightweight and breathable

It provides optimal breathability thanks to its grid-like structure formed by small squares on different planes. Protects the body from absorbing static energy, electromagnetic and UV rays. It's located in the entire trunk area to guarantee complete freedom of movement.

Lightness	★★★★☆	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★☆☆☆☆
Anti-Bacterial	<input checked="" type="checkbox"/>	Hydrophilic	<input checked="" type="checkbox"/>

### SUPERWARM FABRIC

The perfect fabric to keep warm

Thanks to its fleecy brushed texture on the inside, it's perfect for winter. Located on the back, it provides good thermal protection and regulates body temperature.

Thermal protection	★★★★☆	Adaptability	★★★★☆
Breathability	★★★★☆	Compression	★☆☆☆☆

Additional jackets' features:

### WINDBLOCKER NECK

Higher to protect your neck from the cold weather

Ergonomic collar design in which the front part is higher than the back, guaranteeing complete neck and chin protection against wind and cold when riding in cycling position. Includes a flat seam to avoid scratching and friction.

### MEMBRANE WINDPROTECT

Don't let the wind stop you

It offers a total protection against the wind. It's breathable to keep the skin dry and termic regulator body temperature.

### TERMOPOWER FABRIC

Protect from cold weather and regulates your body heat

Specific for winter time, thanks to its inside windprotect membrane structure fabric. Located at the front of the rider's body provides good thermal protection and body temperature termic regulator.

Thermal protection	★★★★★	Adaptability	★★★★☆	Windprotect	<input checked="" type="checkbox"/>
Breathability	★★★★☆	Compression	★☆☆☆☆		

## BIBS

Basic features of our PLUS for Women line:

### RACE POSITION /ERGONOMIC GEOMETRY

Designed to fit your body

All PLUS line bibs have a medium-high compression, with a low shape in the abdominal and lumbar area, so they can enhance the breathing and also offer a comfortable grip feeling.

### MAUSSER SEAMS

Flat seams to avoid unnecessary friction

Flat, elastic seam made with a specialized machine in order to avoid stains, scratches and possible irritants to the skin.

### REFLECTIVE BAND REFLECTOR

Visibility as a security element

Visibility is very important. That's why we incorporated a reflective strip to increase the visibility when riding with low light. Very effective as a road safety element.

### STRIPES SIGMAGRIP TECHNOLOGY

Seamless adherence and compression

System designed to obtain the closest fit possible with the least amount of pressure possible. Also seamless to improve comfort, reduce friction and aid in good circulation in the legs.

Main fabrics used:

### PERFORMER FABRIC

Let the comfort take you to the best performance

The polyamide thread structure with lycra provides compression, adaptability and durability. It is located in the non-customizable part of the bibshort.

Resistance	★★★★☆	Adaptability	★★★★☆
Breathability	★★☆☆☆	Compression	★★★★☆
Bielastic	☑	Opaque	☑

### SUPERROUBAIX FABRIC

Cold weather, warm body

Its fleecy brushed interior and the polyamide provide complete comfort while regulating body temperature and guaranteeing excellent moisture control. Located on the exterior part of the seat of the bibs, its excellent durability makes it ideal for handling friction on the seat.

Thermal protection	★★★★★	Adaptability	★★★☆☆
Breathability	★★★☆☆	Compression	★★★★☆
Bielastic	☑	Pilling resistant	☑

Bib structure:

### STRAP DONA byTactic

Great freedom of movements

This polypropylene elastic strap structure has been ergonomically designed to guarantee that it adapts excellently to a woman's body without restricting movement. It has a Click-Clack clasp closure, so it's easier to go to the restroom without having to remove the jersey or jacket.

### X-TRAC PAD

Specifically for the female figure

This pad has been designed and created especially for a woman's body and it guarantees excellent comfort and optimum performance. It contains two foams of different densities. Also, it has a porous exterior that allows for the correct breathability and quick-drying.

### CLICKPAD

RELEASE SYSTEM

Closure located in the lower back area, which has an easy-open mechanism in order to allow the cyclist to go to the restroom without having to remove the jersey or jacket.

# TEAM PLUS WOMEN'S LINE

## CHOOSE YOUR RIGHT SIZE

Welcome. This page describes step by step, how to determine the most appropriate size you need so you can enjoy the most of a good CUSTOM Line product.

SEARCH YOUR MEASUREMENTS ON SIZE CHART.

- For the JERSEY's size

PLUS FIT FOR WOMEN	XS	S	M	L	XL	2XL
A CHEST CIRCUMFERENCE	72-78	78-84	84-90	90-96	96-102	102-108

Size A - "Chest circumference" remains a priority for the rest

- For the BIB's size

PLUS FIT FOR WOMEN	XS	S	M	L	XL	2XL
B WAIST CIRCUMFERENCE	73-76	76-79	79-82	82-85	85-88	88-91

Size B - "Waist circumference" remains a priority for the rest

Use one measuring tape to determine the exact measurements.

• Measure the distances according to the design below.

A - Chest size  
B - Waist size

Loose fit? Sport fit?

Determine your appropriate size depending on whether you like to dress more or less adjusted.

Example: According to your specific preference, if your chest (A) is 84 cm.

- If you prefer dressing a sport fit line, choose size **(S)** (78-84 cm)
- If you prefer dressing a loose fit, choose size **(M)** (84-90 cm)

# OTHER CYCLING GARMENTS

MADE BY  
 **TACTIC**  
GIRONA SPAIN

# OTHER CYCLING GARMENTS

**ACC 905**  
Windflex Vest

This super-light accessory can easily be folded and stored in a bag when not being used. Ideal in windy conditions and light rain. The collar prevents wind and moisture from entering. Back of the vest made with soft and elastic mesh, for perspiration. Reflective piping to improve safety on the road. Special "pockets" to connect easily with jersey pockets. Waist and shoulder edge: elastic, comfortable and flat piping. Anti-friction zip protector.

**ACC 913**  
Windflex Jacket

This super-light accessory can easily be folded and stored in a bag when not being used. Ideal in windy conditions and light rain. The collar and sleeve ends (cuff) prevent wind and moisture from entering. Thin panels on sides and underarms with lycra to ensure the perfect fitting to everybody. Reflective piping to improve safety on the road. Waist: elastic, comfortable and flat piping. Anti-friction zip protector.

**ACC 912**  
Thermo Vest

Made with a Windprotect membrane, this thermo-elastic vest has two big advantages: it protects against the cold by reducing the amount of air that enters, and it regulates the heat we generate while exercising. It is very recommendable for mild winters. Just wear it with a long-sleeve jersey until your body generates enough heat and then take it off. "Superwarm" fabric: Located on the back. Thanks to its fleecy brushed texture on the inside, it's perfect for fall/winter.

# TRIATHLON

# VELOCHAMPION

## To compete at the top level

Triathlons combine three very different sports, and the ideal clothing must adapt perfectly to the body and still allow for complete freedom of movement. The most used garments are tri-suits, tri-top and the tri-shorts.

The tri-suits are made from fabrics and details designed specifically to, on top of being lightweight, provide protection, adaptability and thermo-regulation to combat wind, precipitation and sweat.

They are close-fitting in order to better disperse water and increase aerodynamics. Aside from their sleek, appealing design, they also aid in muscle recovery and increase the tri-athlete's comfort thanks to its flat seams.

# TRIATHLON MENS LINE

**TRI 570**  
Triathlon Top

“Shiro” fabric: Tissue endowed with great flexibility. Its exterior finish makes it water repellent. It is very breathable, allowing quick removal of sweat. Located in the trunk and back.  
Flat seams: no friction.  
At the top of the zip, look out for a small flap of fabric that will cover the zip pull when it's done up. This stops the zip irritating your neck. Anti-friction zip protector.  
Flat piping on the edge of the neck and shoulder: no friction.  
“Camlock” system in the zip, to prevent the zip from unzipping itself.  
Pockets on both sides, made with mesh.  
No annoying label tags at the neck.

**TRI 581**  
Triathlon Shorts

“Aquazero” fabric: provides high compression. It has a special outside finish to make water repellent. It is also highly resistant to pilling and abrasions. Opaque fabric for intimate parts.  
Flat seams: no friction.  
“Sigmagrip” technology on the legs: second skin feeling. No seams. Printed elastic silicone developed by TACTIC that keeps the elasticity on the legs.  
Elastic and soft band on waist.  
TRI pad (developed by Elastic Interface): Seamless pad. Very thin profile for fast drying. Very elastic for better freedom of movement and flexibility in all 3 disciplines.

**TRI 570**

## TRIATHLON [TECH]

Find out all the technology we have developed to achieve a better comfort and performance

### TRISUITS

Basic features of our TRIATHLON tops:

Basic features of our TRIATHLON shorts:

#### ERGONOMIC GEOMETRY ergo3

*Designed to fit your body*

Pattern system that facilitate the correct compression of tissues so you can have the maximum comfort, while including some mesh side panells for an optimal breathability and draughts of the garment.

#### ZIPPER CAMLOCK

*Zipper lock to prevent vibrations*

The zipper comes equipped with a blocking system, which prevents the pull tab from moving. This mechanism will make sure the zipper doesn't vibrate or open on its own. Designed to use it even with only two fingers.

#### STRIPES SIGMAGRIP

*Seamless adhere and compression*

System designed to obtain the closest fit possible with the least amount of pressure possible. Also seamless to improve comfort, reduce friction and aid in good circulation in the legs.

#### MAUSSER SEAMS

*Flat seams to avoid unnecessary friction*

Flat, elastic seam made with a specialized machine in order to avoid stains, scratches and possible irritants to the skin.

#### ZIPPER STRAP

*Longer, to reach it easily*

Twine 35cm zipper for easy access that allows a quick opening of the zipper.

#### MINI-TRI PAD

*Thin, simple, effective*

Seamless pad. Very thin profile for fast drying. Very elastic for better freedom of movement and flexibility in all 3 disciplines.

Main fabrics used:

#### AQUAZERO FABRIC

*The compression and resistance that you need*

Micropolar laminated fabric which provides high compression. It has an special outside finish to make water repellent. It is also highly resistant to pilling and abrasions. Located in the legs.
